Math 121 Midterm Exam #1 February 21, 2025

- This is a closed-book examination. No books, notes, calculators, cell phones, communication devices of any sort, or other aids are permitted.
- Numerical answers such as $\sin\left(\frac{\pi}{6}\right)$, $4^{\frac{3}{2}}$, $\arctan(\sqrt{3})$, $e^{\ln 4}$, $\ln(e^7)$, or $e^{3\ln 3}$ should be simplified.
- ullet Please show all of your work and justify all of your answers. (You may use the backs of pages for additional work space.)
- 1. Limits [30 Points total, 10 Points each] Evaluate each of the following. Please justify/simplify.

(a) Show that
$$\lim_{x\to 0} \frac{\cos(3x) - \arctan(2x) + 2x - 1}{e^{-4x} - 1 + 4x} = \boxed{-\frac{9}{16}}$$

- (b) Show that $\lim_{x\to 0^+} \sqrt{x} \cdot \ln x = \boxed{0}$
- (c) Show that $\lim_{x\to\infty} \left(1 \arcsin\left(\frac{2}{x^6}\right)\right)^{x^6} = e^{-2}$

Integrals [34 Points total] Compute each of the following Definite Integrals. Please justify/simplify.

- **2.** Show that $\int_{-2}^{2} \sqrt{4-x^2} \ dx = \boxed{2\pi}$
- **3.** Show that $\int_0^{\ln \sqrt{3}} \frac{e^x}{\sqrt{4 e^{2x}}} \ dx = \boxed{\frac{\pi}{6}}$
- **4.** Show that $\int_{e}^{e^3} \frac{1}{x \left[3 + (\ln x)^2 \right]} \ dx = \boxed{\frac{\pi}{6\sqrt{3}}}$

More Integrals [36 Points total] Compute the following Indefinite Integrals. Please justify/simplify.

- **5.** Compute $\int x \arcsin x \ dx$
- **6.** Compute $\int \frac{1}{(9+x^2)^{\frac{7}{2}}} dx$ Hint: $3^6 = 729$
- 7. Compute $\int \ln(x^2+9) dx$
