

# Worksheet 12 Answer Key

1.  $r = 3 \cos \theta$

Cartesian Plot

$r = 3 \cos \theta$

Polar Plot

$r = 3 \cos \theta$

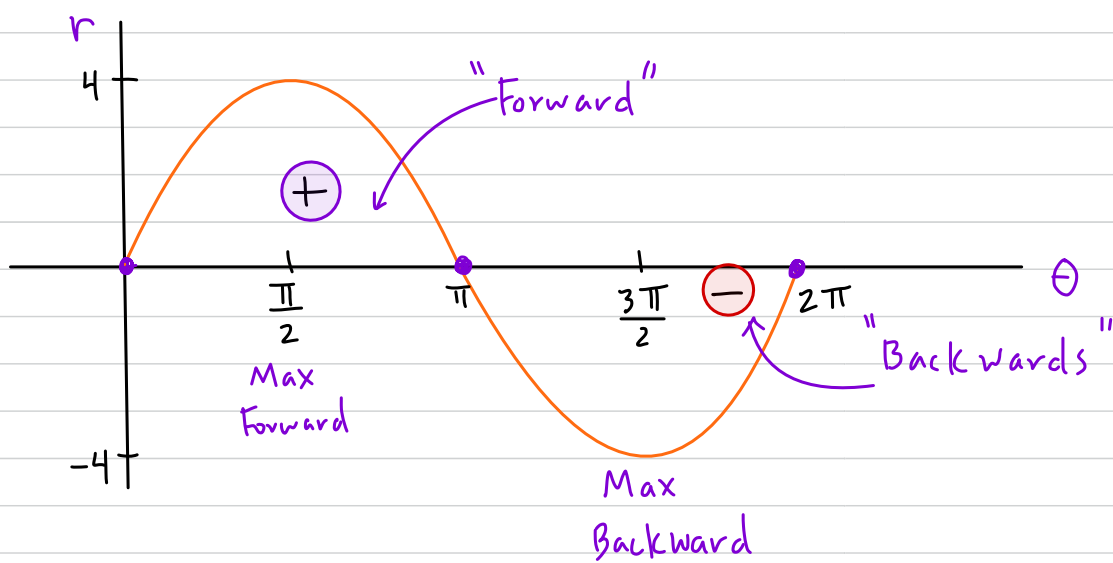

Note: Circle closes one Full loop as  $\theta$  ranges from  $0$  to  $\pi$ .

Then it retraces the Circle as  $\theta$  ranges from  $\pi$  to  $2\pi$ .

2.  $r = 4 \sin \theta$

Cartesian Plot

$r = 4 \sin \theta$

Polar Plot

$r = 4 \sin \theta$

Q2:  $r \geq 0$   
Trace Forwards

Q1:  $r \geq 0$   
Trace Forwards

Q3:  $r \leq 0$   
Re Trace Backwards

Q4:  $r \leq 0$   
Re Trace Backwards

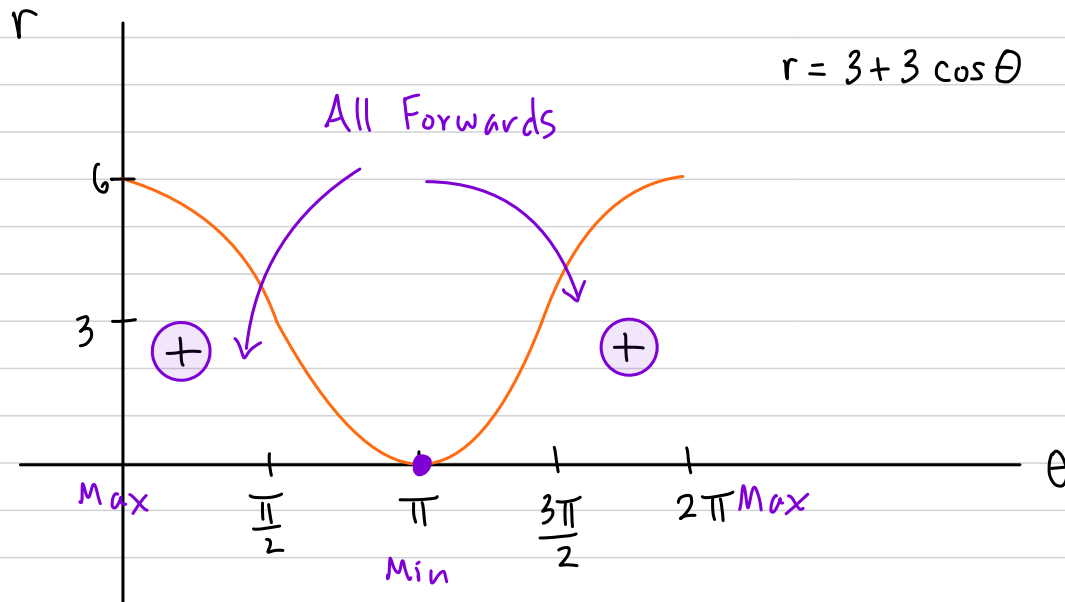

Note: Circle closes one full loop as  $\theta$  ranges from 0 to  $\pi$  "Forwards"  
Then it retraces the circle as  $\theta$  ranges from  $\pi$  to  $2\pi$  "Backwards"  
Repeat

3  $r = 3 + 3 \cos \theta$

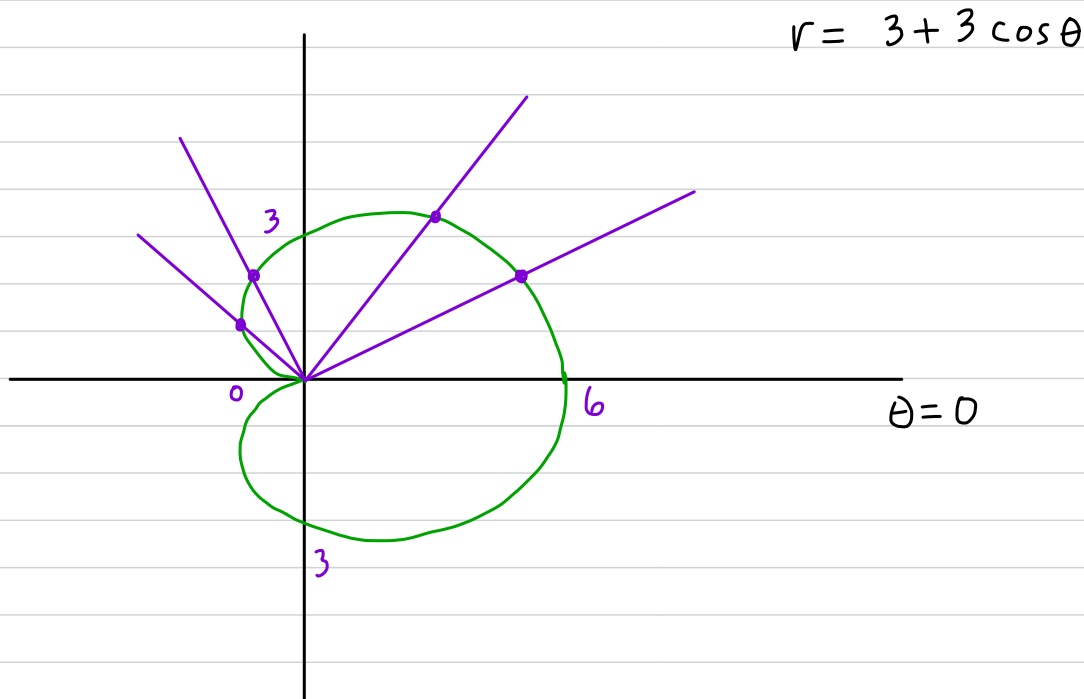

↑ shift up 3 units

Cartesian Plot

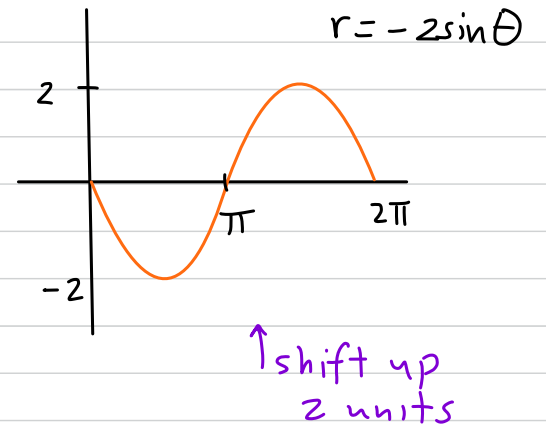

Polar Plot

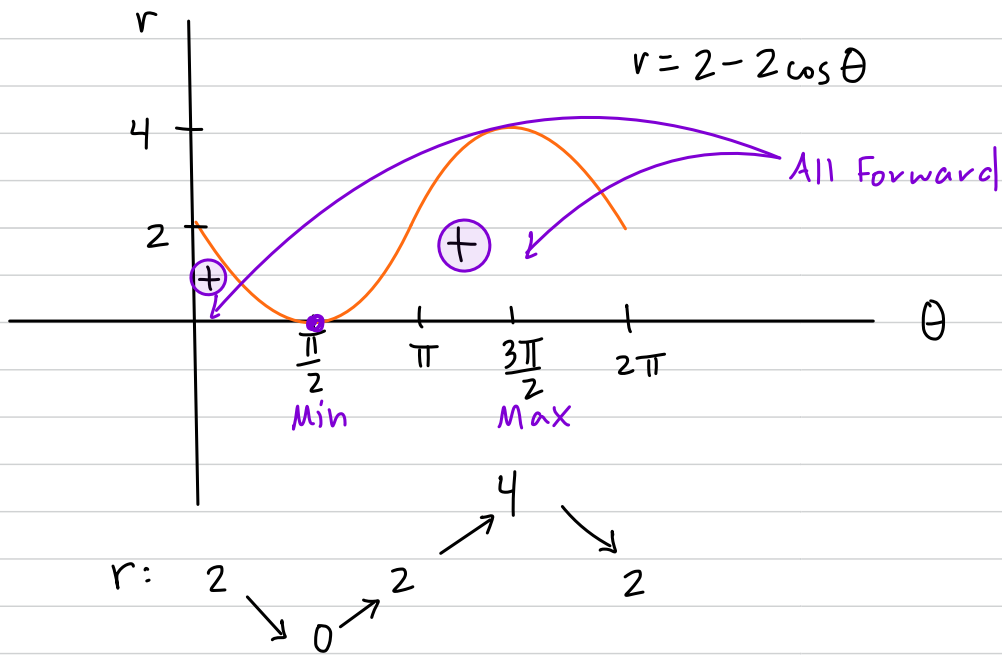

Note: 3-6-3 Cardioid closes one Loop as  $\theta$  ranges from 0 to  $2\pi$   
Then retraces same Cardioid, repeating every  $2\pi$  cycle.

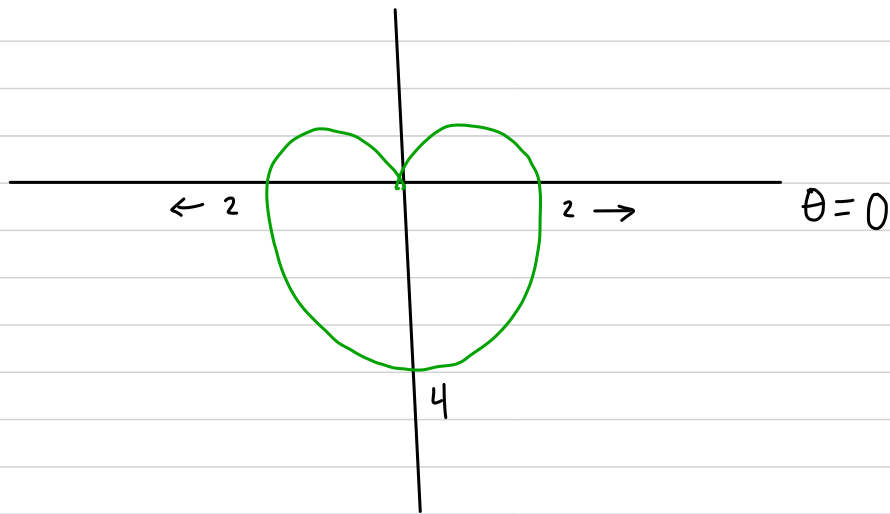

4  $r = 2 - 2\sin\theta$

Cartesian Plot

Polar Plot

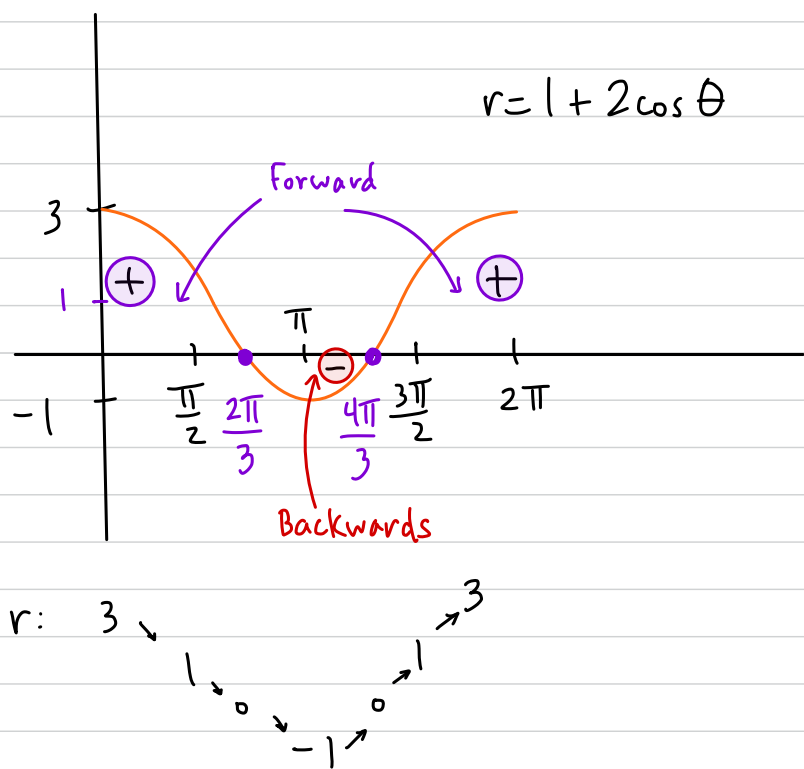

Note: Like a 2-4-2 Cardioid "flipped"

5.  $r = 1 + 2\cos\theta$

Shift up  $\uparrow$  1 unit

Cartesian Plot

Set  $r = 1 + 2\cos\theta = 0$

$\hookrightarrow 2\cos\theta = -1$

$\cos\theta = -\frac{1}{2}$

$\theta = \frac{2\pi}{3}, \frac{4\pi}{3}$  zeroes, where  $r = 0$

Polar Plot

6.  $r = 3 + 2 \sin \theta$

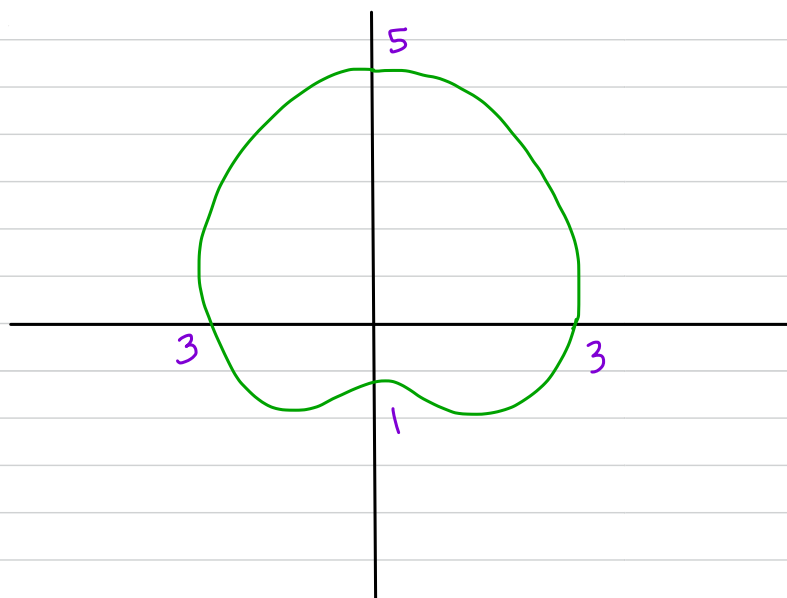

Cartesian Plot

Note: no  $r=0$  or Negative  $r$  values

Polar Plot

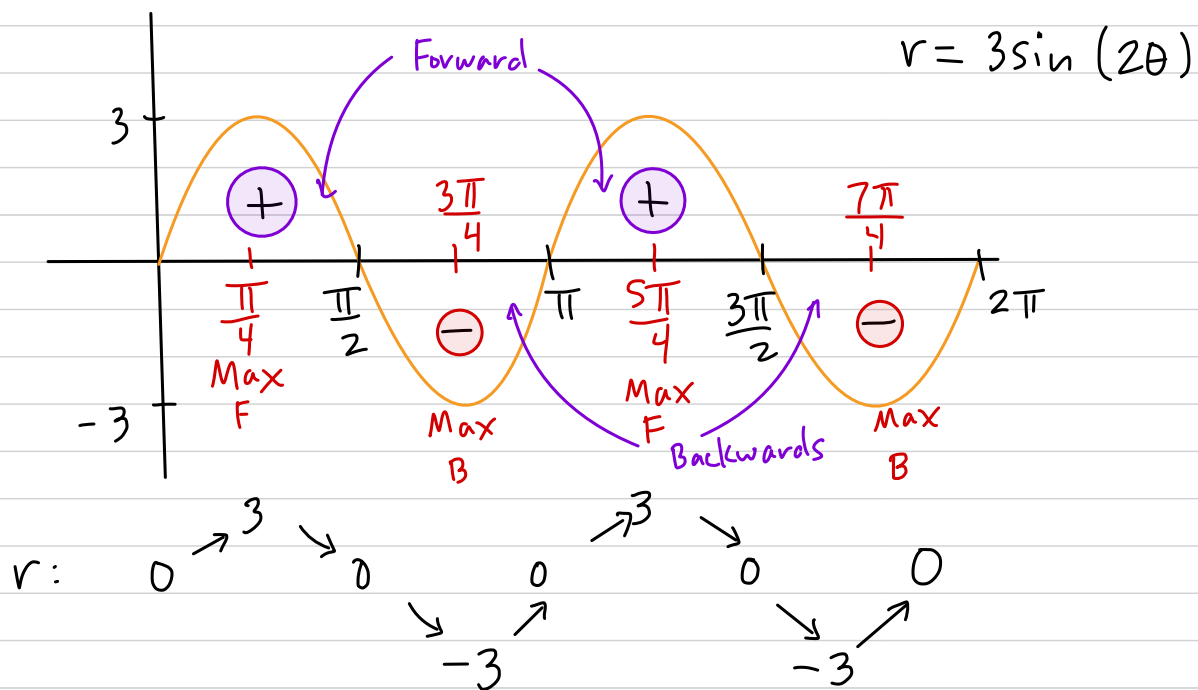

Note: No Cusp, no  $r=0$

7.  $r = 3 \sin(2\theta)$

Stretch 3 units  
in output

Cartesian Plot

Polar Plot
