#### Math 121, Section(s) 01, Spring 2024

#### Homework #17

Due Friday, April 19th in Gradescope by 11:59 pm ET

**Goal:** Exploring Estimating Values and Definite Integrals using the Alternating Series Estimation Theorem. Also some review of Interval and Radius of Convergence.

1. Use Series to Estimate  $\frac{1}{e}$  with error less than  $\frac{1}{20}$ . Justify.

2. Use Series to Estimate  $\frac{1}{e}$  with error less than  $\frac{1}{100}$ . Justify. (Can reuse work from 1)

3. Use Series to Estimate  $\frac{1}{e}$  with error less than  $\frac{1}{500}$ . Justify. (Can reuse work from 1)

4. Use Series to Estimate sin(1) with error less than  $\frac{1}{1000}$ . Justify.

5. Use Series to Estimate  $e^{-\frac{1}{3}}$  with error less than  $\frac{1}{100}$ . Justify.

- 6. Use Series to Estimate  $\arctan\left(\frac{1}{2}\right)$  with error less than  $\frac{1}{100}$ . Justify.
- 7. Use Series to Estimate  $\int_0^1 x \ln(1+x^3) dx$  with error less than  $\frac{1}{20}$ . Justify.

8. Use Series to Estimate 
$$\int_0^1 x \sin(x^2) dx$$
 with error less than  $\frac{1}{1000}$ . Justify

Review: Find the Interval and Radius of Convergence for each of the following.

9. 
$$\sum_{n=1}^{\infty} (n!)^2 (3x-7)^n$$
 10.  $\sum_{n=1}^{\infty} \frac{(-1)^n (5x-2)^n}{n^3 8^n}$  11.  $\sum_{n=1}^{\infty} \frac{(x-7)^n}{n! \sqrt{n}}$ 

12. New! Use Series to compute  $\lim_{x\to 0} \frac{1-\cos x}{1+x-e^x}$ . Check answer with L'H Rule too.

# **REGULAR OFFICE HOURS**

## Monday: 12:00-3:00 pm

6:00–7:30 pm TA Gretta, SMUDD 208

### Tuesday: 1:00–4:00 pm

 $7{:}30{-}9{:}00~\mathrm{pm}$  TA Aidee, SMUDD 208

9–10:30 pm TA Natalie, SMUDD 208

## Wednesday: 1:00-3:00 pm

7:30–9:00 pm TA Gretta, SMUDD 208

#### Thursday: none for Professor

 $7{:}30{-}9{:}00~\mathrm{pm}$  TA Aidee, SMUDD 208

9:00–10:30 pm TA Natalie, SMUDD 208 Friday: 12:00–2:00 pm

Chase the fine details and make a full justification.

YES! Vacation!
